About This Content

The Edinburgh-Glasgow Expansion Pack is a recreation of the line from Edinburgh Waverley to Glasgow Queen Street via Falkirk High, and including the Grangemouth Intermodal terminal and refinery area. Originally dating back to 1842, the line runs through open countryside passing through several stations including Haymarket, Linlithgow, Polmont, Falkirk High and Bishopbriggs, and passes the famous Murrayfield Stadium outside Edinburgh and the world famous Falkirk Wheel. Also included is the Falkirk Grahamston Branch between Polmont and Greenhill Upper Junction and the Class 170 Turbostar DMU. The route features highly-detailed models of both terminus stations, all stations along the line and the expansive intermodal terminal and refinery area, complete with atmospheric sound effects. The Edinburgh-Glasgow Expansion Pack has been developed by Thomson Interactive with a focus on the 'driver's eye' view, all station and line-side features being fully detailed and more distant landscape features represented with simpler detail to improve game rendering performance while driving.

Includes

- Class 170 DMU.
- Full Edinburgh to Glasgow via Falkirk High route, with Edinburgh Waverley, Haymarket, Edinburgh Park, Linlithgow, Polmont, Falkirk High, Falkirk Grahamston, Camelon, Grangemouth Intermodal Terminal, Croy, Lenzie, Bishopbriggs and Glasgow Queen Street.
- Six scenarios plus four free-roams.

Title: Train Simulator: Edinburgh-Glasgow Route Add-On

Genre: Simulation

Developer:

Thomson Interactive

Publisher:

Dovetail Games - Trains

Franchise:

Train Simulator

Release Date: 25 Mar, 2011

7ad7b8b382

Minimum:

OS:Windows® Vista / 7 / 8

Processor:Processor: 2.8 GHz Core 2 Duo (3.2 GHz Core 2 Duo recommended), AMD Athlon MP (multiprocessor variant or comparable processors)

Memory:2 GB RAM

Graphics:512 MB with Pixel Shader 3.0 (AGP PCIe only)

DirectX®:9.0c

Hard Drive:6 GB HD space

Sound:Direct X 9.0c compatible

Other Requirements:Broadband Internet connection

Additional:Quicktime Player is required for playing the videos

English

train simulator edinburgh-glasgow route add-on. train simulator edinburgh-glasgow route add-on

Would love this route but down loaded the extra update and lost the whole route i would recommend the simulator to all. One of only a handful of Scottish routes. Nice scenarios and train-model too.. Get this DLC if you are new to train simulator you get some really good DLC with it. and I like using this route if I'm sad it makes me feel better.. It is a very enjoyable and value for money route.

Pros

- + A nice looking handful of trains with good horns, cabs and breaks
- + Well modeled scenery
- + Many scenarios
- + Value for money

Cons

- Not alot of choice in where you go (all Glasgow Queen Street - Edinburgh Waverly) except different conditions
- Not to lively sometimes

Recommended!. Really nice route to drive. My only two complaints focus on the Edinburgh Stations. Waverley seems a little lifeless and it is a shame that model at Haymarket has not been updated to reflect some of the changes from the last 4 years. Otherwise, great fun and certainly a route that I'll go back to soon!. its a nice route and you can save some money if you buy it. Nice little route, just enough to do. Really nice route to drive. My only two complaints focus on the Edinburgh Stations. Waverley seems a little lifeless and it is a shame that model at Haymarket has not been updated to reflect some of the changes from the last 4 years. Otherwise, great fun and certainly a route that I'll go back to soon!. The Train Simulator alternate to Mary Poppins carpetbag. There are so many possibilities that this route gives you to not just driving trains, but to creating scenarios. The routes are amazing to drive and the Scottish weather options bring this route to life. The Turbostar is good to drive and it comes with other liveries too. Definitely recommended.. Great route. It includes the class 170 pack which includes all reskins for the 170. The original pack and all trains included are cross compatible even if the class 170 is not a fun train to drive. The route really has some nice assets but the whole route isn't very demanding at all. You can also download a scenery extension from DPsim which is also available on workshop. This extends the route to Stirling, Carstairs and South Gyle. The original route offers a rather large service variety of stopping passenger services, express passenger services and freight. Overall, great route;

10/10

This is a great add on route. It looks great AND runs great at a higher than most fps. Very relaxing scenarios as it is very flat. Watch the speedzones and the cautions and it pretty much drives itself at notched throttle settings giving you a chance to really explore the different camera views of the incredible countryside. The buildings and streets are well lit at night giving you the sense of a living world. Cars on the roads and other trains also add to this. There is a late evening scenario that has excellent lighting and mood. Highly recommended.. very nice route to drive on, looks good in any quality, high or low settings also there are a variety of routes you can travel on, great fun. Brilliant DLC even if it is one of the older routes.

Lots of detail in the route with things such as the Falkirk stadium and BT Murrayfield modelled.

There is also a free extension available on the steam workshop which extends the route from Waverley to Carstairs.

The class 170 is beginning to show its age but is still a brilliant DMU, even if it is lacking in features compared to some of the more recently modelled trains.

100% recommend this DLC.. very nice route to drive on, looks good in any quality, high or low settings also there are a variety of routes you can travel on, great fun. It is a very enjoyable and value for money route.

Pros

- + A nice looking handful of trains with good horns, cabs and breaks
- + Well modeled scenery
- + Many scenarios
- + Value for money

Cons

- Not a lot of choice in where you go (all Glasgow Queen Street - Edinburgh Waverley) except different conditions
- Not too lively sometimes

Recommended!. I love this route but I downloaded the extra update and lost the whole route I would recommend the simulator to all. Ok, so I bought this route on sale last week. I actually just wanted the Class 170 but decided to buy the package since the price is now the same (yeah yeah, sale will come, but still, more value for money and stuff.....)

This route is actually pretty versatile, there is a lot of possibility for freight but also opportunities for express/stopping trains on this route. You don't need hours to finish the whole route but there is enough track to keep you occupied.

The quality is quite good even though I play only with a laptop with less than average specs.

I'd recommend this route over the standalone Class 170 package.

Oh, to answer the question for everyone who wants to know it; the Class 170 comes with ALL liveries, not just the Scottish ones, also the others, including Class 171 Southern.. This is an older route and it's not even very long but I highly recommend this if it's on sale (I don't think ANY TrainSim route is worth full price to be honest).

Firstly, it looks great and has the scope to do commuter or express passenger as well as freight workings as well. The class 170 DMU really is a great little train as well (developed by Thompson) and comes with quite a few liveries for free as well. If you like any routes in the UK and don't have the Class 170 then this should be a bonus reason to get it.

Secondly, if you don't have a killer, supercharged PC and want something that won't turn into a slideshow, this is one of the best routes I've run. It's SOOOO smooth that Jeremy Clarkson would probably mention 'babyoil' if he was talking about it!
